Admonter

Values

We have been dealing with wood in this region for almost 1,000 YEARS. Its eternal beauty and originality have inspired our craft ever since. It is important to us that we source our wood exclusively from SUSTAINABLY

managed forests and ensure a working environment based on RESPECT – both for our forests and those we work with. For us, QUALITY and TRUST must come first and we strive for this to be the most natural thing in the world.

... all from a single source.

Floor, ceiling, wall, stairs, furniture, door and acoustic elements. Harmonised, in contrast or a mosaic from many design elements. The Admonter range allows you to draw from the full source of inspiration.

... design with wood.

Admonter offers everything – both inside and outside the mainstream. Short or long, narrow or wide, in neat rows or in creative patterns. Individuality is part of our DNA.

... multilayered texture.

This makes all Admonter products so stable and resistant to warping.

... ora et labora et lege.

Admonter Holzindustrie AG is a subsidiary of the Admont Abbey and lives up to its responsibility as a company that has grown for around 1,000 years.

... naturalness and sustainability.

All Admonter products are PEFC and EPD certified. Admonter is one of the pioneers in the area of climate and environmental protection.

... team.

In Admont, around 300 people work daily to make the most out of the wood as raw material and so create the Admonter products in the quality that they are known for internationally.

... earnest.

Nature is unpretentious, authentic and honest. At Admonter, we want to preserve this honesty and bring it into your home. Without some magic formula, but with a lot of flair for the craft and attention to detail.

... regionality.

An Admonter product is 100% produced in Admont. Only in Admont. Period.

NO OTHER WOOD IS LIKE LARCH.

Living is more than just sleeping, eating and having a roof over our heads.

Our homes should both be a pleasant, comforting nest and a reflection of ourselves.

Home is where the wood is. Where I can relax, recover and recharge my energy.

I want to surround myself with beauty and warmth.

To just be.

To do something good for myself. Larch offers all this.

A wood that has more to offer than all others and hard to beat when it comes to natural beauty and wellbeing.

As an alpine conifer the larch knows how to assert itself and exist at high altitudes and in an extreme environment.

It embodies strength, resilience and health. Whoever welcomes the larch into their own four walls, not only gets a piece of furniture or a floor or wall panelling. Its positive effect on our health is undisputed.

The larch succeeds in enveloping everything around it in an atmosphere of wellbeing and warmth.

LARCH – ALPINE BEAUTY OR POWERFUL SOURCE OF WARMTH.

Barely any other wood is as unique and individual as the local mountain larch. Its branches and grain combine in an artful composition, in a way only possible by nature.

We appreciate its natural beauty and warmth.

Not only does it visually invite us to touch and linger, but it also shares its warmth with us.

In a study by Holzforschung Austria,

Larch with a natural oil finish proved itself as the warmest underfoot wood species.

It also has active antiseptic and antibacterial qualities. In ancient times, and in spiritual circles, Larch was considered the home of forest Fairies, sympathetic to people and as a guardian tree due to its resilience.

What type of wood could be more appropriate to surround yourself with?

WE MAKE IT LASTING COMMITMENT.

AN ADMONTER PRODUCT NOT ONLY UNDERGOES NUMEROUS **IN-HOUSE QUALITY CHECKS** BEFORE IT FINDS ITS NEW HOME, BUT THE **QUALITY AND ENVIRONMENTAL** ORIGIN OF EVERY ADMONTER PRODUCT IS ALSO TESTED BY OFFICIAL TESTING AND CERTIFICATION BODIES.

Ecologically harmless. Living in a pleasant environment revitalises the senses – in every respect: The Austrian Eco-label awarded by the Federal Ministry of Agriculture, Forestry, Environment and Water Management (BMLFUW), guarantees the health and environmental safety of our products.

For nature's sake. For the production of Admonter products, we only use timber from sustainable forest cultivation which protects a variety of species of animals and plant life and the preservation of a natural environment with high recreational value.

EPD - ecological footprint. The wood used to manufacture an Admonter product comes exclusively from forests where sustainable forestry is practised.

It guarantees the conservation of the biodiversity of the fauna and flora and the preservation of the natural environment with high recreational value. With the Environmental Product Declaration (EPD), information is provided on the environmental impact of individual products or materials, thus enabling building certification and life cycle assessment (LCA).

In addition to the raw materials and their origin, the manufacturing process of the product is also described in the EPD – from the use of the raw materials to the factory gate, taking the resource and energy consumption into account.

Austrian production. We, at Admonter, take our responsibility seriously.

In order to guarantee the high standards of our products and to protect jobs locally, we exclusively produce our products in Austria and will continue to do so in the future.

30 year warranty. Admonter grants a 30 year warranty on our products. Guaranteed against any material or manufacturing defects.

LARCH NATURAL

Larch adds warmth and comfort to reduced design, losing its rusticity through the clarity of its forms. A perfect symbiosis.
