

## Application examples for further processing/finishing of natural wooden panels

**Can you edge-cover the wooden panel that no bright cutting edge is visible?**

Cut edges via sawing technique are not entirely avoidable.

edging

**How can the color of the bright cutting edge be adapted to the surface?**

The adaptation can be carried out using stain, lye or repair oil: available on request from Admonter to match the type of wood.

mitred

Edge mitred (Recl. Wood hacked H3)

#### Item numbers for hand sized samples

1	129672	Furniture panel in Oak brushed natural oiled with millings on the back
2	129673	Reclaimed Wood Alder grey with edging
3	129676	Recl. W. Alder grey edge mitred and preceding
4	129678	Reclaimed Wood hacked H3 or H4 with edging

### Benefits of the products in a technical comparison

Construction	Consistent solid wood construction in the same type of wood enables e.g. milling, grooving or drilling without additional processing such as e.g. edge processing   closed and joint-tight middle layer.
Dimension	Width: 2030 mm, Length: 2000 mm or 2400 mm -> therefore easy storage and clear „waste optimization“
