Wooden Floors

Admonter on underfloor heating systems

Admonter wooden floors are ideally suited for underfloor heating systems. We suggest that our products ideally are fully glued down for best results with Admonter elastic adhesive. However, like all engineered boards our planks can be laid as a floating installation (except 2-layer floors and 3-layer floors small, they have to be fully glued down). We recommend hot-water underfloor heating systems set at low temperature. Please find detailed information in the information sheet [Admonter on underfloor heating systems](#).

Admonter accessories

The wide range of accessories matches your natural wooden floor and includes skirting boards and staircase solutions.

Regular care and maintenance

Please see the Admonter maintenance & installation instructions or visit <http://www.admonter.com/en/downloads/>

PLEASE NOTE: natural oiled easy care - NO INITIAL OIL TREATMENT IS REQUIRED! Repair and supplementary oils you can find in our Admonter price list. Further information about our products can be found at admonter.at

Admonter is a 100% natural product. A picture can therefore never reflect the original. We recommend a consultation based on sample boards.
