

SURFACE FINISHES IN TECHNICAL COMPARISON

	pro-care	easy-care	matt lacquered
Surface type	factory-made pre-oiled finish	factory-made finalised oiling, ready for living	factory-made finalised surface finish, ready for living
Initial oiling	absolutely required	not required (except for bathroom areas)	not possible
Maintenance	required according to the usage (depending on the room climate and cleaning frequency)	required according to the usage (with easy-care maintenance oil, excess oil must be carefully taken off - depending on the room climate and cleaning frequency)	no continuous care needed
Care products	Admonter maintenance oil pro care und object oil pro care	Admonter maintenance oil easy care	No care products
Cleaning products	Admonter Clean & Care	Admonter Clean & Care	Admonter Clean & Care
Pore expression	diffusive	diffusive	Closed-pored
Repair	partial repair work easy to do	partial repair work possible	no partial repair work possible (only change of entire areas or planks)
Basic cleaning	possible – new surface finish must be done	possible – if required (subject to the level of saturation of the total appearance)	not possible
Slip class	R10 according to DIN 51130 for oak and larch brushed	R11 according to DIN 51130 for oak and larch natural oiled	no proof of testing available
Object suitability	currently there is no standard for oiled surfaces	currently there is no standard for oiled surfaces	According to ÖNORM C2354 all FLOORS oak in matt lacquered do reach stress class C. This corresponds to the highest possible class and confirms the suitability for particularly heavy use.

ALL Admonter surface finishes meet the strict emission requirements of the Austrian UZ, of the German TÜV profiCert and of the French A+

SURFACE FINISHES IN COMPARISON FOR THEIR „BENEFITS“

	pro-care	easy-care	matt lacquered
Initial oiling	complete saturation & leveling of the entire floor area after installation. Additional business for processors/dealers (service, accessories & maintenance oil)	Zeitersparnis & Sicherheit gegen Verschmutzung	time saving & safety against pollution
Maintenance	additional business for processors/dealers, long service life with proper care	Zusatzgeschäft für Verarbeiter/Händler lange Nutzungsdauer bei richtiger Pflege samtig glatte Oberfläche mit geringem Reinigungsaufwand	no maintenance/cleaning effort
Cleaning products	1 cleaning product for all surface textures	1 cleaning product for all surface textures	1 cleaning product for all surface textures
Pore expression	typical wood property is preserved (regulation of indoor climate, warmth of wood)	typical wood property is preserved (regulation of indoor climate, warmth of wood)	-
Repair	no costly large-scale refurbishment	no costly large-scale refurbishment	-
Basic cleaning	no costly large-scale refurbishment	no costly large-scale refurbishment	-
Object suitability	-	high chemical & mechanical resistance	Suitable for objects according to ÖNORM C2534
